High Pride
Higher Performance
Highest Quality

JEC Ltd. specializes in the field of sanitary pumps.

JEC was established in 1990 and started producing sanitary pumps utilizing precision cast and pressed parts for the first time in Korea. Since then JEC has been successfully supplying to the process industries centrifugal, rotary and self-priming pumps, as well as blenders. JEC pumps are now renowned for reliability both for general duties and special applications. JEC's success is built upon high quality manufacture and customer satisfaction. Our policy is one of long term vendor partnerships.

Good relations with our customers are prerequisite to our growth.

JEC considers exchanging ideas their customers of the highest importance.

It is our belief JEC fully supports to meet customers expectations and contributes towards their prosperity.

We are always atriving to make every effort to start new initiates.

The JEC philosophy is one of continuous improvement and keeping promises.

Our pride is created by high quality!

JEC JTP series rotary pumps are specifically designed for use on road tankers. Customer benefits include lightweight increasing product payload, high capacity, easy cleaning and maintenance. All parts in contact with the fluid are designed and manufactured in compliance with international sanitary standards. Spare parts are fully interchangeable enabling pumps to be serviced without the need for skilled technician.

To meet widely varying application requirements JEC offers a variety of features and option to best serve related industry needs.

JTP series Road Tanker Rotary Pumps

JEC - Always a Step Ahead

JTP300 Series

- JEC JTP series are specifically designed for discharging road tankers and are the highest capacity relative to weight pumps available in the truck market. This key feature is achieved by using an aluminium gearbox. There are 5 models available having displacements between 0.78 to 1.63 litres / rev, and pressure ratings range between 8 to 12 bar. All JTP pumps are suitable for operating at temperatures up to 120 °C.
- The revolutionary JTP design is EHEDG(European Hygienic Engineering & Design Group) certified. Manufactured in SUS316L stainless steel, the pump sets the standard for uptime, reliability, and CIP performance..

JTP200 Series

- All four seal options shown on the following page are accommodated by a universal rotor case providing cost-effective inter-changeability even if retrospectively fitted.
- Female drive shaft accepts direct-coupled SAE B or C flanged hydraulic motors as an alternative to the standard PTO male shaft (JTP300 series only).
- Connections can be changed between the horizontal and vertical planes simple by moving the mounting feet.

ZLT330 Series

- Extraction tool facilitates easy rotor removal even when stuck.
- Unique front loading product seals gives fast maintenance, easier cleaning, and less downtime. By removing only the front cover, both rotors and product seal can be fully accessed without disconnecting the process line.
- Single hard faced mechanical seal are standard supply. Double mechanical seal specified for hazardous duties and for liquids which solidify at ambient temperatures or upon contact with the atmosphere.

SPECIFICATIONS

JTP Series	Model No.	Displacement			Standard Connection Size		Max. Differential Pressure		Weight		Max. Speed Rev / min
		Liters / rev	Int Gal / 100rev	US Gal / 100rev	mm	Inches	BAR	PSI	KGs	LBs	
200	JTP220-078-15	0,78	17,14	20,60	50	2	15	218	79	174	700
	JTP230-107-10	1,07	23,52	28,26	76	3	10	145	83	183	700
